Excise High Level and Business Requirements BPM Report for Core	
INTRODUCTION	

1. INTRODUCTION

1.1. Document Purpose

This document presents the high level and business requirement BPMs for Core. Annexes to this report contain the model graphics and business requirements that support the readability of this report.

1.2. Deviation From TEMPO

The following TEMPO sections are not part of this document:

- Sign Off list;
- Distribution List;
- Scope;
- Applicable Documents;
- List of Tables;
- List of Figures.

The following TEMPO sections are added to this document:

- Project Ownership;
- Intended Audience.

1.3. Assumption and Constraints

The reader should have a basic knowledge of the levelling guidelines [R01].

1.4. Project Ownership

The unit DG TAXUD/C3 is the project owner of this Excise High Level and Business Requirements BPM Report.

1.5. Intended Audience

1. The purpose of this document is to establish a common understanding between readers that are familiar with the applicable documents and may belong to the following categories:

- Any person responsible for the Excise - EMCS business / system processes, requirements, functional specifications or conformance testing;
- Any person responsible for the Export - AES business / system processes, requirements, functional specifications or conformance testing;
- Any person of the development team of DG TAXUD/C5 who will use this document as a reference during the development cycle;
- Any person from the DG TAXUD units who has to verify whether the current document is consistent with the applicable documents and depicts the solution to be followed;
- Any Member State (MS) or Trade representatives who have to identify the actions, implications and consequences on their national domain, including both business people and people having an IT background.

1.6. Structure of Document

This document is organised as follows:

- Introduction;
- References, containing a list of acronyms and abbreviations and the documents referenced in this report;
- Document History, listing the different versions and submission dates of this report;

EU Customs High Level and Business Requirement BPM Report	REF: EU Customs High Level and Business Requirements BPM Report for Core
Excise High Level and Business Requirements BPM Report for Core	
INTRODUCTION	

- High Level Business Overview, providing an overview of the business domain and the actors, and mentioning the legal units responsible for the business domain covered in this report
- Process Models, visualising in separate sections information from the high level and business requirement BPMs relating to the business domain covered in this report.

In a separate report, the following related annex may be found:

- Annex 1: Model Graphics
- Annex 2: Business Requirements, providing a list of all business requirements for the processes covered in this report
- Annex 3: List of Amendments.

HIGH LEVEL BUSINESS OVERVIEW	

4. HIGH LEVEL BUSINESS OVERVIEW

4.1. Business Domain Overview

EMCS Core encapsulates all processes that make up the business life cycle of an excise movement under duty suspension arrangements.

4.2. Actors

ACTOR	ROLE
MSA	The Excise Office of each Member State of the Union, to which the Treaty is applicable, in accordance with Article 299 thereof, with the exception of third territories.(Art. 3 2020/162) This MSA can be the MSA of Dispatch, the MSA of Destination or the MSA of Export.
Consignee	<p>The Economic Operator that reports receipt of goods and submits this information to the MSA of Destination.</p> <p>Note: in these specifications, unless explicitly stated otherwise, the terms "consignor" and "consignee" mean any type of consignor and consignee respectively. For instance, "consignor" may mean authorised warehouse keeper, or registered consignor, or certified consignor or temporary certified consignor. The specific type of operator will be indicated only when a process, rule, condition, etc. requires it (i.e. applies only to one or more specific types of consignors or of consignees).</p>
Claiming MSA	<p>The Claiming MSA is the MSA that estimates having the right to claim duties on the shortages according to the place where they have actually arisen, based on all evidences at its disposal.</p> <p>The Claiming MSA can be the MSA of Dispatch or the MSA of Destination or any other MSA.</p>
Consignor	<p>The Economic Operator that submits the e-AD and all possible changes, e.g. cancellation, change of destination, splitting, etc. to the MSA of Dispatch. The Consignor is the owner of the contents of an e-AD, i.e. he is the only one allowed to change its content.</p> <p>Note: in these specifications, unless explicitly stated otherwise, the terms "consignor" and "consignee" mean any type of consignor and consignee respectively. For instance, "consignor" may mean authorised warehouse keeper, or registered consignor, or certified consignor or temporary certified consignor. The specific type of operator will be indicated only when a process, rule, condition, etc. requires it</p>

EU Customs High Level and Business Requirement BPM Report	REF: EU Customs High Level and Business Requirements BPM Report for Core
Excise High Level and Business Requirements BPM Report for Core	
HIGH LEVEL BUSINESS OVERVIEW	
	(i.e. applies only to one or more specific types of consignors or of consignees).
Economic Operator	<p>Any economic operator involved at a given movement either as Consignor or as a Consignee.</p> <p>In accordance with Regulation No 389/2012, Art. 2(10), a person who, in the course of his business, is involved in activities covered by legislation on Excise Duties, whether authorized to do so or not.</p>
Economic Operator	<p>Any economic operator involved at a given movement either as Consignor or as a Consignee.</p> <p>In accordance with Regulation No 389/2012, Art. 2(10), a person who, in the course of his business, is involved in activities covered by legislation on Excise Duties, whether authorized to do so or not.</p>
Customs Office of Export	The customs office designated by the customs authorities in accordance with the customs legislation where for goods leaving the customs territory of the Union the formalities for placing them under the export procedure are to be carried out or where a re-export notification is to be lodged, where applicable.
Declarant or Representative	<p>The Declarant or Representative can be the person presenting the goods or the holder of the temporary storage facility or the holder of a storage facility in a free zone or any other person able to present the goods where the person presenting the goods</p> <p>has been informed, and given its consent under a contractual arrangement, that this person lodges the declaration.</p>
MSA of Export or Destination	<p>The MSA of Destination is the excise office that forwards, the received information to the consignee, and formally validates the report of receipt before transferring it to the MSA Dispatch. It monitors the incoming traffic, e.g. the goods entering into tax warehouse. In addition, it monitors arriving movements to all intra-EU destinations, e.g. tax warehouses, registered consignees and exempted consignees (*).</p> <p>The MSA of Export is the excise office that forwards the e-AD to the Customs Office of Export, receives the Exit Results and completes the Report of Export.</p> <p>The MSA of Destination and the MSA of Export are the same MSA.</p> <p>(*) The exempted consignees (Article 11 and 12 of the Directive 2020/262) will be dealt separately.</p>
Former MSA of Destination	The MSA of Destination mentioned in the original e-AD and which is no longer the MSA of Destination of the movement,

EU Customs High Level and Business Requirement BPM Report		REF: EU Customs High Level and Business Requirements BPM Report for Core	
Excise High Level and Business Requirements BPM Report for Core			
HIGH LEVEL BUSINESS OVERVIEW			
	due to a Change of Destination or Splitting performed on the specific movement.		
Sending MSA	The Excise Office that sends a message to another Excise Office. This can be any MSA, i.e. the MSA of Dispatch, the MSA of Destination/ MSA of Export or a third MSA.		
MSA of Dispatch	The Excise Office that receives and validates all information (draft e-AD/e-SAD, cancellation, etc) submitted by the Consignor, before sending this information to the MSA Destination. It monitors the outgoing traffic, e.g. the goods leaving the tax warehouse.		
Receiving MSA	The Excise Office that receives a message from another Excise Office. This can be any MSA, i.e. the MSA of Dispatch, the MSA of Destination/ MSA of Export or a third MSA.		
Customs Office of Exit	The customs office competent for the place from where the goods will leave the customs territory of the Union to a destination outside the customs territory of the Union.		
MSA of Destination	<p>The MSA of Destination is the excise office that forwards, the received information to the consignee, and formally validates the report of receipt before transferring it to the MSA Dispatch. It monitors the incoming traffic, e.g. the goods entering into tax warehouse. In addition, it monitors arriving movements to all intra-EU destinations, e.g. tax warehouses, registered consignees and exempted consignees (*).</p> <p>(*) The exempted consignees (Article 11 and 12 of the Directive 2020/262) will be dealt separately.</p>		
Consignor	<p>The Economic Operator that submits the e-AD/e-SAD and all possible changes, e.g. change of destination, splitting (duty suspension only), cancellation (duty suspension only), etc. to the MSA of Dispatch. The Consignor is the owner of the contents of an e-AD/e-SAD, i.e. he is the only one allowed to change its contents.</p> <p>Note: in these specifications, unless explicitly stated otherwise, the terms "consignor" and "consignee" mean any type of consignor and consignee respectively. For instance, “consignor” may mean authorised warehouse keeper, or registered consignor, or certified consignor or temporary certified consignor. The specific type of operator will be indicated only when a process, rule, condition, etc. requires it (i.e. applies only to one or more specific types of consignors or of consignees).</p>

HIGH LEVEL BUSINESS OVERVIEW		
Sending MSA	The Excise Office that sends a message to another Excise Office. This can be any MSA, i.e. the MSA of Dispatch, the MSA of Destination/ MSA of Export or a third MSA.	
Former Consignee	The Consignee mentioned in the original e-AD and which is no longer the Consignee of the movement, due to a Change of Destination or Splitting performed on the specific movement.	
Guarantor	<p>The guarantor is the person who provides the guarantee of the movement (in order to cover the risks inherent in the movement under suspension of excise duty).</p> <p>Usually, the movement guarantee is provided by the Consignor. However it is possible that the Consignee, the transporter or the owner of the goods is requested to do it. It is also possible that several of these actors jointly provide the movement guarantee.</p>	
Receiving MSA	The Excise Office that receives a message from another Excise Office. This can be any MSA, i.e. the MSA of Dispatch, the MSA of Destination/ MSA of Export or a third MSA.	
Excise Authority	N/A	

4.3. Legal Units

The following legal units are responsible for the business domain: DG TAXUD.

PROCESS MODELS	

5. Process Models

This section provides the full business process documentation of the processes within the scope of this business domain.

For each business process the process details, such as assumptions and reference documents, are documented. In addition a set of tables describe each process flow component (events and tasks) with further details regarding their legal references and additional descriptive information where necessary.

In Annex 1 and Annex 2 the related model graphic and business requirements can be found respectively.

Table 5.8: Process Details

5.2. L3 Business Requirements BPM

5.2.1. Process L3-CORE-01-01-Submit and Register an e-AD/e-SAD

5.2.1.1. Objective of Process

The purpose of the current process is to describe the submission and handling of the e-AD/e-SAD for a movement of Excise Goods under suspension of Excise Duty or under the Duty Paid B2B regime, in accordance with the Council Directive 2020/262, Delegated Regulation (EU) 2022/1636, and Implementing Regulation (EU) 2022/1637.

The origin of the movement can be a tax warehouse or a place of importation (in accordance with Article 16(1) of Directive 2020/262). The destination of the movement (as defined in Article 16(1) of Directive 2020/262) can be a tax warehouse, a registered consignee (or a temporary registered consignee in accordance with Article 18 of the Council Directive 2020/262), a place where the excise goods leave the territory of the Union (i.e. movement for export), a place of direct delivery (in accordance with Article 16(4) of Directive 2020/262), an exempted consignee (*) or a certified consignee or a temporary certified consignee in accordance with Article 35(8) of the Council Directive (EU) 2020/262.

The process starts when the Excise Goods are to be moved inside the territory of the European Union. For this purpose, the Consignor/Certified Consignor submits a draft e-AD/e-SAD to the MSA of Dispatch.

The MSA of Dispatch receives and then validates the data of the received draft e-AD/e-SAD, as defined in Table 1 of Annex I of the Delegated Regulation (EU) 2022/1636. When the data of the draft e-AD/e-SAD are found invalid, the Consignor is informed about these invalid data and the whole process ends here. When the data of the draft e-AD/e-SAD data are found valid, the MSA of Dispatch assigns an ARC to the e-AD/e-SAD and communicates the e-AD/e-SAD to the Consignor. The Consignor receives the e-AD/e-SAD and the process continues.

In case the destination of the movement is unknown, the whole process ends here. In case the destination of the movement is known, the MSA of Dispatch also forwards the e-AD/e-SAD to the MSA of Destination / MSA of Export (**).

The MSA of Destination/ MSA of Export receives the e-AD and then:

- In case of MSA of Export (i.e. movement is for export), the whole process ends here;
- In case of MSA of Destination, the MSA of Destination forwards the e-AD/e-SAD to the Consignee and the whole process ends.

(*) The exempted consignees (Article 11 and 12 of the Council Directive 2020/262) will be dealt separately.

(**) The MSA of Destination and the MSA of Export are the same MSA.

5.2.2. Process L3-CORE-01-02-Perform Report of Receipt/ Export

5.2.2.1. Objective of Process

The purpose of the current process is to describe the submission and handling of the Report of Receipt/Export for a movement of Excise Goods under suspension of Excise Duty or under the Duty Paid B2B regime, in accordance with the Council Directive 2020/262, Delegated Regulation (EU) 2022/1636, and Implementing Regulation (EU) 2022/1637.

This process starts when:

- ☐ The Consignee receives the Excise Goods; or
- ☐ The MSA of Export (*) receives the Exit Results from the Customs Office of Export; or
- ☐ The MSA of Export (**) receives the Exit Results from the Customs Office of Export.

Case 1 (The Consignee receives the Excise Goods)

In case the process starts when the Consignee receives the Excise Goods, he/she submits the draft Report of Receipt (indicating that the consignment had been accepted) to the MSA of Destination, within 5 working days from the time the Consignee takes the delivery of the Excise Goods. It is also possible the Consignee to submit the draft Report of Receipt to the MSA of Destination after the aforementioned time limit of the 5 working days, given that this delay is duly justified to the satisfaction of the competent authorities. When the time limit of the five working days is reached and this delay is not duly justified to the satisfaction of the competent authorities, the submission of the draft Report of Receipt is no longer possible and the whole process ends at this point.

The MSA of Destination receives and then validates the data of the received draft Report of Receipt (indicating that the consignment had been accepted). If the data of the draft Report of Receipt are found invalid, the Consignee is informed about these invalid data and the whole process ends here. If the data of the draft Report of Receipt are found valid, the MSA of Destination confirms to the Consignee the registration of the Report of Receipt in accordance with the Article 19(2)(a) and (b) of the Council Directive (EU) 2020/262. Following, the MSA of Destination sends the Report of Receipt to the MSA of Dispatch and the process ends at the MSA of Destination at this point. Upon receipt of the Report of Receipt, the MSA of Dispatch forwards it to the Consignor and the whole process ends here.

Case 2 (The MSA of Export (*) receives the Exit Results from the Customs Office of Export)

In case the process starts when the MSA of Export (*) receives the Exit Results (indicating that the consignment had been accepted or refused) from the Customs Office of Export, the MSA of Dispatch registers the exit results and proceeds with completing a Report of Export. Upon completion of the Report of Export, the MSA of Dispatch sends it to the Consignor and the whole process ends.

Case 3 (The MSA of Export (**) receives the Exit Results from the Customs Office of Export)

In case the process starts when the MSA of Export (**) receives the Exit Results (indicating that the consignment had been accepted or refused) from the Customs Office of Export, the MSA of Destination/MSA of Export registers the exit results and then proceeds with completing a Report of Export. Then, the MSA of Dispatch sends the Report of Export to the MSA of Dispatch, which then forwards it to the Consignor and the whole process ends.

(*) The MSA of Dispatch is also the MSA of Export. MSA of Destination is not applicable in this case.

(**) The MSA of Destination and the MSA of Export are the same MSA.

5.2.3. Process L3-CORE-01-03-Handle Evidence of Irregularity or Evidence of Destruction/Loss

5.2.3.1. Objective of Process

The purpose of the current process is to describe the provision of irregularities for a movement of Excise Goods under suspension of Excise Duty, in accordance with Council Directive 2020/262, Delegated Regulation (EU) 2022/1636, Implementing Regulation (EU) 2022/1637, and Article 15 of Council Regulation (EU) 389/2012.

The process starts when Evidence of Irregularity or Destruction/Loss becomes available at MSA of Dispatch.

When the evidence available refers to total destruction or irretrievable loss which has occurred/has been detected (in accordance with Article 6 of the Council Directive (EU) 2020/262), the goods are not released for consumption and the whole process ends here.

EU Customs High Level and Business Requirement BPM Report	REF: EU Customs High Level and Business Requirements BPM Report for Core
Excise High Level and Business Requirements BPM Report for Core	
PROCESS MODELS	

When the evidence available refers to an Irregularity which has occurred (in accordance with Article 9 of the Council Directive (EU) 2020/262), the release for consumption takes place in the Member State where the irregularity occurred and the whole process ends at this point.

When the evidence available refers to an irregularity which has been detected (in accordance with Article 9 of the Council Directive (EU) 2020/262), the goods are deemed to have been released for consumption in the Member State where the irregularity has been detected and the process continues.

In case the time limit of four months from the start of the movement (in accordance with Article 9 of the Council Directive (EU) 2020/262) is reached (which means that no evidence of irregularity detected/occurred has been received by then), the MSA of Dispatch checks if the Guarantor of the movement is informed that the goods have not arrived at their destination. Then:

- If the Guarantor of the movement is already informed that the goods have not arrived at their destination, the goods are deemed to have been released for consumption in the MSA of Dispatch and the process continues;
- If the Guarantor of the movement is not informed that the goods have not arrived at their destination, the MSA of Dispatch informs the Guarantor of the non-arrival of the goods (in accordance with Article 9 of the Council Directive (EU) 2020/262). Then, the following may happen:
 - a. If the MSA of Dispatch receives from the Guarantor of the movement (within one month from the date the Guarantor was informed by the MSA of Dispatch of the non-arrival of the goods) evidence of where the irregularity occurred (in accordance with Article 9 of the Council Directive (EU) 2020/262), the release for consumption takes place in the MSA where the irregularity occurred. At this point, the whole process ends;
 - b. If the time limit of one month (from the date the Guarantor was informed by the MSA of Dispatch of the non-arrival of the goods) is reached (in which case it means that no evidence of where the irregularity occurred has been received from the Guarantor by then), the goods are deemed to have been released for consumption in the MSA of Dispatch and the process continues.

Following (that is, when the goods are deemed to have been released for consumption in the MSA where the irregularity has been detected or in the MSA of Dispatch), it is possible, within a period of three years from the start of the movement (in accordance with Article 9 of the Council Directive (EU) 2020/262), the MSA of Dispatch to receive from the MSA of Irregularity (in this case the MSA where the irregularity occurred), information ascertaining in which MSA the irregularity actually occurred.

In case the time limit of three years (from the start of the movement) is reached (which means that no information ascertaining in which MSA the irregularity actually occurred has been received by then), the goods are deemed to have been released for consumption in the MSA where the irregularity has been detected (i.e. in case evidence of where irregularity has been detected is received) or in the MSA of Dispatch (i.e. in case no evidence of irregularity is received) and the whole process ends here.

In case the MSA of Dispatch receives, within the time limit of three years (from the start of the movement), information ascertaining in which MSA the irregularity actually occurred, the release for consumption takes place in the MSA where the irregularity has occurred and the whole process ends at this point.

5.2.4. Process L3-CORE-01-04-Perform Cancellation

5.2.4.1. Objective of Process

The process describes the submission and handling of the Cancellation a movement of Excise Goods under suspension of Excise Duty, in accordance with the Council Directive (EU) 2020/262, Delegated Regulation (EU) 2022/1636, and Implementing Regulation (EU) 2022/1637.

The Consignor proceeds in cancellation of a movement of Excise Goods under suspension of Excise Duty, as long as the movement has not begun (i.e. as long as the excise goods have not left the place of dispatch).

The process starts when the Consignor decides to cancel an e-AD for a movement of Excise Goods under suspension of Excise Duty, to be moved inside the territory of European Union. For this purpose, the Consignor submits a draft Cancellation to the MSA of Dispatch.

The MSA of Dispatch receives and then validates the data of the received draft Cancellation. When the data of the draft Cancellation are found invalid, the Consignor gets informed of invalid data in the draft message and the whole process ends here. When the data of the draft Cancellation are found valid, the MSA of Dispatch adds the date and time of validation to the Cancellation. Thereafter, the MSA of Dispatch communicates the Cancellation to the Consignor. The Consignor receives the Cancellation and the process continues.

In case the destination of the movement is unknown, the whole process ends here. In case the destination of the movement is known, the MSA of Dispatch also forwards the Cancellation to the MSA of Destination.

The MSA of Destination receives the Cancellation, forwards this to the Consignee and the whole process ends.

5.2.5. Process L3-CORE-01-05-Perform Splitting of Consignment

5.2.5.1. Objective of Process

The purpose of the current process is to describe the Splitting of a Consignment of energy products, moved under suspension of Excise Duty, into two or more movements, in accordance with the Council Directive (EU) 2020/262, Delegated Regulation (EU) 2022/1636 and the Implementing Regulation (EU) 2022/1637.

The prerequisite to run this process are:

1. the total quantity of excise goods does not change;
2. the splitting is carried out in the territory of a Member State which permits such a procedure;
3. the competent authorities of that Member State are informed of the place where the splitting is carried out.

The process starts when the Consignor decides to split the consignment. For this purpose, the Consignor submits a draft Splitting operation to the MSA of Dispatch.

The MSA of Dispatch receives and then validates the data of the received draft Splitting Operation. When the data of the draft Splitting Operation are found invalid, the Consignor gets informed of the invalid data in the draft message and the whole process ends here. When the data of the draft Splitting Operation are found valid, the MSA of Dispatch generates a new e-AD per each Destination, replacing the original e-AD. Hereafter, the MSA of Dispatch forwards the e-AD to the Consignor and to the MSA of Destination mentioned in e-AD as described in processes “L3-CORE-AS-IS-01-07-Forward e-AD to Consignor” and “L3-CORE-AS-IS-01-08-Forward e-AD to MSA of Destination”, respectively.

Then, the MSA of Dispatch generates for the original e-AD, a Notification of Splitting. The MSA of Dispatch communicates the Notification of Splitting to the Consignor. The Consignor receives the Notification of Splitting and the process ends at the Consignor’s side.

In case the destination of the movement is unknown, the whole process ends here. In case the destination of the movement is known, the MSA of Dispatch also forwards the Notification of Splitting to the MSA of Destination mentioned in the original e-AD.

The MSA of Destination mentioned in the original e-AD receives the Notification of Splitting and then forwards it to the Consignee mentioned in the original e-AD and the process ends.

(*) original e-AD, means the e-AD which has exactly previously been generated.

Table 5.111: Event Notification of Splitting sent to Consignee mentioned in the original e-AD

5.2.6. Process L3-CORE-01-06-Perform Change of Destination

5.2.6.1. Objective of Process

The purpose of the current process is to describe the Change of Destination of a movement of Excise Goods under suspension of Excise Duty under suspension of Excise Duty or under the Duty Paid B2B regime, in accordance with the Council Directive 2020/262, Delegated Regulation (EU) 2022/1636, and Implementing Regulation (EU) 2022/1637. The process starts when the Consignor decides to amend the destination as provided for by Article 20(7), first sentence, and Article 36(5) of Council Directive (EU) 2020/262, or to complete the destination as provided for in Article 22(1) and (2), Council Directive (EU) 2020/262 for a movement under suspension of Excise Duty or for a Duty Paid B2B movement. For this purpose, the Consignor submits a draft Change of Destination to the MSA of Dispatch.

EU Customs High Level and Business Requirement BPM Report	REF: EU Customs High Level and Business Requirements BPM Report for Core
Excise High Level and Business Requirements BPM Report for Core	
PROCESS MODELS	

The MSA of Dispatch receives and then validates the data of the draft Change of Destination. When the data of the draft Change of Destination are found invalid, the Consignor is informed of the invalid data in the draft message and the whole process ends here. When the data of the draft Change of Destination are found valid, the MSA of Dispatch adds the date and time of validation and also adds a sequence number to the Change of Destination. Thereafter, the MSA of Dispatch communicates the Change of Destination to the Consignor. The Consignor receives the Change of Destination and the process continues. The MSA of Dispatch updates the original e-AD/e-SAD according to the information in the Change of Destination.

The MSA of Dispatch examines what the update of e-AD/e-SAD indicates:

· If the update indicates a Change of Place of Delivery (with respect to the data group "TRADER Place of Delivery" of the e-AD/e-SAD), but not a change of the Member State of destination nor a change of Consignee, the process "L3-CORE-AS-IS-01-09-Handle Change of Destination indicating Change of Place of Delivery" is triggered. Upon completion of the process, the MSA of Dispatch has sent to the Consignor and to the MSA of Destination the Change of Place of Delivery.

· If the update indicates a Change of MSA of Destination (only applicable for Duty Suspension movements), the process "L3-CORE-AS-IS-01-10-Handle Change of Destination indicating Change of MSA of Destination" is triggered. Upon completion of the process the MSA of Dispatch has sent to the Consignor and to the former MSA of Destination, if any (since it is possible the MSA of Destination in the original e-AD to be unknown), the Change of MSA of Destination. Furthermore, the e-AD is sent to the MSA of Destination.

· If the update indicates Change of Consignee in the same Member State of destination, the process "L3-CORE-AS-IS-01-11-Handle Change of Destination indicating Change of Consignee" is triggered. Upon completion of the process, the MSA of Dispatch has sent the Change of Consignee to the Consignor and the e-AD/e-SAD to the MSA of Destination.

Table 5.150: Event Change of Destination Forwarded

5.2.10. Process L3-CORE-01-10-Handle Change of Destination indicating Change of MSA of Destination

5.2.10.1. Objective of Process

The purpose of the current process is to describe how the MSA of Dispatch handles a Change of Destination indicating Change of MSA of Destination.

The process starts, when a Change of Destination indicating Change of MSA of Destination is available at the MSA of Dispatch.

In case the MSA of Destination in the original e-AD (*) is known, the MSA of Dispatch forwards the Change of Destination to the MSA of Destination mentioned in the original e-AD (former MSA of Destination). The former MSA of Destination receives the Change of Destination and then proceeds with generating a Notification of Change of Destination. Following, the former MSA of Destination sends this Notification of Change of Destination to the Consignee mentioned in the original e-AD, i.e. to the former Consignee of the movement and the process continues.

Regardless if the Destination in the original e-AD is known or unknown, the MSA of Dispatch forwards the e-AD to the MSA of Destination. Finally, the MSA of Destination forwards the e-AD received from the MSA of Dispatch to the Consignee and the whole process ends.

(*) original e-AD, means the e-AD which has exactly previously been generated.

Table 5.162: Event e-AD sent to Consignee

5.2.11. Process L3-CORE-01-11-Handle Change of Destination indicating Change of Consignee

5.2.11.1. Objective of Process

The purpose of the current process is to describe how the MSA of Dispatch handles a Change of Destination indicating Change of Consignee.

The process starts when a Change of Destination indicating Change of Consignee is available at the MSA of Dispatch.

The MSA of Dispatch forwards the e-AD/e-SAD to the MSA of Destination and the process continues at the MSA of Destination side.

After receiving the e-AD/e-SAD, the MSA of Destination forwards this to the Consignee. Following, the MSA of Destination generates a Notification of Change of Destination and sends this to the Consignee mentioned in the original e-AD/e-SAD (*), i.e. to the former Consignee of the movement. At this point, the whole process ends.

(*) original e-AD/e-SAD, means the e-AD/e-SAD which has exactly previously been generated.

5.2.12. Process L3-CORE-01-12-Manage Explanations on Reasons for Shortages or Excesses

5.2.12.1. Objective of Process

The purpose of the current process is to describe the exchange of explanation on Reason for Shortages or Excesses for a movement of Excise Goods under suspension of Excise Duty, covering as a generic process the explanation exchanges among the interested entities.

The present process starts when the Economic Operator (Consignor or Consignee) decides to submit a draft Explanation on Reason for Shortages or Excesses for a particular movement to his/her MSA (i.e. MSA of Dispatch or MSA of Destination, respectively).

More specifically, the current process covers the following scenarios:

1. The Consignor (Economic Operator) may optionally submit a draft Explanation on Reason for Shortages or Excesses to the MSA of Dispatch (Sending MSA). In such case, the MSA of Dispatch receives and then validates the data of the received draft Explanation on Reason for Shortages or Excesses. When the data of the draft Explanation on Reason for Shortages or Excesses are found invalid, the Consignor is informed about these invalid data and the whole process ends here. When the data of the draft Explanation on Reason for Shortages or Excesses are found valid, the MSA of Dispatch proceeds with forwarding the Explanation on Reason for Shortages or Excesses to the MSA of Destination/ MSA of Export (Receiving MSA) and the whole process ends.
2. The process can also/alternatively be triggered by the Consignee (Economic Operator). For this purpose, the Consignee (Economic Operator) may optionally submit a draft Explanation on Reason for Shortages or Excesses to the MSA of Destination (Sending MSA). In this case, the MSA of Destination receives and then validates the data of the received draft Explanation on Reason for Shortages or Excesses. When the data of the draft Explanation on Reason for Shortages or Excesses are found invalid, the Consignee is informed about these invalid data and the whole process ends here. When the data of the draft Explanation on Reason for Shortages or Excesses are found valid, the MSA of Destination proceeds with forwarding the Explanation on Reason for Shortages or Excesses to the MSA of Dispatch (Receiving MSA) and the whole process ends.

NOTE: The Economic operator can be the Consignor or the Consignee.

Table 5.184: Event Explanation on Reason for Shortages or Excesses forwarded to other MSA

5.2.13. Process L3-CORE-01-13-Manage Information on Intended Claims

5.2.13.1. Objective of Process

The purpose of the current process is to describe the submission of information on intended claims (*) by an MSA that estimates having the right to claim duties on the shortages according to the place where they have actually arisen.

The current process starts whenever an MSA (Claiming MSA) judges it relevant to undertake an analysis of a given movement to determine whether duties could be due in the considered Member State.

For this purpose, the Claiming MSA (**) proceeds with analysing the available information. More specifically, the analysis is performed based on all evidence available at the Claiming MSA, namely:

- a report of receipt where shortages were ascertained either by the Consignee or from information reported by the Customs;
- any event report, either issued in its Member State or in any other Member State;
- any control report, either issued in its Member State or in any other Member State;
- possibly, explanations provided by the consignor and/or by the consignee on the reasons of the shortage (or excess);
- any other available evidence.

In case the Claiming MSA does not have all information necessary to perform the analysis, the Claiming MSA can download the movement and/or any complementary information from any other concerned MSA (by using the L3-ACO-AS-IS-01-01-Cooperation on Request).

Following, the Claiming MSA prepares the results of the analysis (giving the basis of calculation of duties that it intends to claim from the guarantor). In case the Claiming MSA is the MSA of Dispatch, the whole process ends here. In case the Claiming MSA is not the MSA of Dispatch, the Claiming MSA communicates the analysis results to the MSA of Dispatch and the process ends.

(*) This exchange of information intends at ensuring that the claims issued by several Member States are coordinated, and in particular that there will not be concurrent claims on the same shortage.

(**) The Claiming MSA can be the MSA of Dispatch or the MSA of Destination or any other MSA.

5.2.14. Process L3-CORE-01-21-Handle Export of Goods under Excise Duty Suspension

5.2.14.1. Objective of Process

The purpose of this process is to depict the handling of the exportation of goods when they are moving under duty suspension arrangements, both in the case where the MSA of Dispatch is the same as the MSA of Export and in the case where the MSA of Dispatch is different from the MSA of Export.

The process is triggered at the Customs Office of Export Application when the Customs Declaration arrives. Then, the Customs Office of Export validates the Export Declaration and based on the validation performed either rejects the Export Declaration (for negative validation result) and informs the Declarant/Representative or proceeds with the request of the e-AD from the EMCS (for positive validation result).

Then, there are two cases:

- ☐ Case 1: MSA of Dispatch is the same with MSA of Export;

EU Customs High Level and Business Requirement BPM Report	REF: EU Customs High Level and Business Requirements BPM Report for Core
Excise High Level and Business Requirements BPM Report for Core	
PROCESS MODELS	

- ☐ Case 2: MSA of Dispatch is different than the MSA of Export.

For Case 1, in the MSA of Dispatch, the e-AD request arrives and then the 'L3-CORE-01-22-Exportation of goods under excise when MSA of Dispatch is the same with MSA of Export'. Based on the end result of the 'L3-CORE-01-22-Exportation of goods under excise when MSA of Dispatch is the same with MSA of Export', one of the following may occur:

- ☐ e-AD rejected and process ends here;
- ☐ Export Declaration rejected and process ends here;
- ☐ Goods not released for Export and process ends here;
- ☐ Export Invalidation Notification arrived and process ends here;
- ☐ Goods have been released for Export and the Exit Results are received and process ends here;
- ☐ Amended Export Declaration received, therefore process starts again (i.e. validation of the amended export declaration).

In the same time, in the Customs Office of Export, the 'L3-CORE-01-22-Exportation of goods under excise when MSA of Dispatch is the same with MSA of Export' is initiated upon the e-AD response received from the MSA of Dispatch. Same as above, upon completion of 'L3-CORE-01-22-Exportation of goods under excise when MSA of Dispatch is the same with MSA of Export', one of the following may occur:

- ☐ e-AD rejected and process ends here;
- ☐ Export Declaration rejected and process ends here;
- ☐ Goods not released for Export and process ends here;
- ☐ Export Invalidation Notification arrived and process ends here;
- ☐ Goods have been released for Export and the Exit Results are received and process ends here;
- ☐ Amended Export Declaration received, therefore process starts again (i.e. validation of the amended export declaration).

For Case 2, in the MSA of Destination/MSA of Export, the e-AD request arrives and then the 'L3-CORE-01-23-Exportation of goods under excise when MSA of Dispatch is different than MSA of Export'. Based on the end result of the 'L3-CORE-01-23-Exportation of goods under excise when MSA of Dispatch is different than MSA of Export', one of the following may occur:

- ☐ e-AD rejected and process ends here;
- ☐ Export Declaration rejected and process ends here;
- ☐ Goods not released for Export and process ends here;
- ☐ Export Invalidation Notification arrived and process ends here;
- ☐ Goods have been released for Export and the Exit Results are received and process ends here;
- ☐ Amended Export Declaration received, therefore process starts again (i.e. validation of the amended export declaration).

In the same time, in the Customs Office of Export, the 'L3-CORE-01-23-Exportation of goods under excise when MSA of Dispatch is different than MSA of Export' is initiated upon the e-AD response received from the MSA of Dispatch. Same as above, upon completion of 'L3-CORE-01-23-Exportation of goods under excise when MSA of Dispatch is different than MSA of Export', one of the following may occur:

- ☐ e-AD rejected and process ends here;
- ☐ Export Declaration rejected and process ends here;
- ☐ Goods not released for Export and process ends here;
- ☐ Export Invalidation Notification arrived and process ends here;
- ☐ Goods have been released for Export and the Exit Results are received and process ends here; Amended Export Declaration received, therefore process starts again (i.e. validation of the amended export declaration).

5.2.15. Process L3-CORE-01-22-Exportation of Goods under Excise Duty Suspension when MSA of Dispatch is the same with MSA of Export

5.2.15.1. Objective of Process

The purpose of the current process is to describe the exportation of goods under Excise Duty Suspension when MSA of Dispatch is different than MSA of Export/MSA of Destination. This is in accordance with Council Directive (EU) 2020/262, Delegated Regulation (EU) 2022/1636 and Implementing Regulation (EU) 2022/1637; the Union Customs Code and its Implementing and Delegated Act (Council Regulation (EU) 952/2013, Implementing Regulation (EU) 2015/2447, Delegated Regulation (EU) 2015/2446).

Before the acceptance of the Export Declaration

In the MSA of Dispatch, the process starts when it receives an e-AD request. The MSA of Dispatch identifies if the e-AD is available:

- ☐ If the e-AD is not available, the MSA of Dispatch forwards the e-AD rejection to the Customs Office of Export and the process ends here for the MSA of Dispatch;
- ☐ If the e-AD is available and in the correct state, the MSA of Dispatch forwards the e-AD to the Customs Office of Export.

The flow continues in the Customs Office of Export.

EU Customs High Level and Business Requirement BPM Report	REF: EU Customs High Level and Business Requirements BPM Report for Core
Excise High Level and Business Requirements BPM Report for Core	
PROCESS MODELS	

Upon the receipt of the response from the MSA of Dispatch, the Customs Office of Export identifies if all requested e-AD(s) were received:

- ☐ If not all the e-AD(s) are available, the process ends at this point for Customs Office of Export;
- ☐ If all the e-AD(s) are available, the Custom Office of Export cross-checks the e-AD and the customs declaration.

Then, the Customs Office of Export examines if the cross-check result is positive:

- ☐ If the result is negative, the Customs Office of Export notifies the MSA of Dispatch about the negative cross-check result and optionally (subject to national implementation) about the rejected export declaration. The process ends here at the Customs Office of Export. Then, the MSA of Dispatch forwards the rejection of export declaration to the consignor and the process ends here for the MSA of Dispatch;
- ☐ If the result is positive the Customs Office of Export determinates if export declaration is lodged prior to the presentation of the goods.

The Customs Office of Export examines if the declaration is lodged prior to the presentation of the goods:

- ☐ If the export declaration is not lodged prior to the presentation of goods, the Customs Office of Export accepts the customs declaration and sends a notification for accepted declaration to the MSA of Dispatch and to the Declarant or Representative. The MSA of Dispatch forwards the export declaration acceptance to the consignor;

- ☐ If the export declaration is lodged prior to the presentation of goods, then one of the following might occur:

- o If the Customs Office of Export receives an export presentation notification from the Declarant, then validates the export presentation notification and accepts the customs declaration. Then, sends a notification for accepted declaration to the MSA of Dispatch and to the Declarant or Representative. The MSA of Dispatch forwards the export declaration acceptance to the consignor;

- o If the time limit to receive the export presentation notification expires, the Customs Office of Export rejects the customs declaration lodged prior to the presentation of goods, notifies the Declarant/Representative and the MSA of Dispatch about the rejection of export declaration due to timer to receive export presentation notification expiry and the process ends here for the Customs Office of Export ;

- o If the Customs Office of Export receives a cancellation request for the pre-lodged export declaration from the Declarant, the Customs Office of Export validates the cancellation request and examines if the request is valid. In case the Customs Office of Export accepts the request, notifies the Declarant/Representative and the MSA of Dispatch about the rejection of export declaration due to cancellation of the pre-lodged and the process ends here for the Customs Office of Export. In the opposite case of having the Customs Office of Export rejecting the request, the Customs Office of Export restarts the timer to receive an export presentation notification and waits to receive an export presentation notification or a cancellation request for the pre-lodged export declaration.

In the same time, at the MSA of Dispatch, the respective events might occur:

- ☐ Either the e-AD negative cross-check result arrives and the rejection of the export declaration shall be forwarded to the Consignor; or

- ☐ The notification for rejected declaration arrives due to either the cancellation of the pre-lodged export declaration or the expiry of time limit to receive the export presentation notification. The rejection of the export declaration shall be forwarded to the Consignor; or

- ☐ The notification for accepted export declaration arrives and the process is still active at the MSA of Dispatch.

After the acceptance of Export Declaration but before the release of the goods

The Customs Office of Export performs risk analysis and controls. Then, after this, one of the following might occur:

- ☐ If the Customs Office of Export receives an amendment request the process ends at this point and continues in the parent model L3-CORE-01-21;

EU Customs High Level and Business Requirement BPM Report	REF: EU Customs High Level and Business Requirements BPM Report for Core
Excise High Level and Business Requirements BPM Report for Core	
PROCESS MODELS	

- ☐ If the Customs Office of Export takes a decision to release the goods for Export, the Customs Office of Export releases the goods for export and notifies the Customs Office of Exit, the Declarant and the MSA of Dispatch. The MSA of Dispatch forwards the release notification to the Consignor;
- ☐ If the Customs Office of Export takes a decision not to Release the goods for Export, the Customs Office of Export does not release the goods for export and notifies the Customs Office of Exit, the Declarant and the MSA of Dispatch. The MSA of Dispatch forwards the non-release notification to the Consignor and the process ends here for MSA of Dispatch;
- ☐ If the Customs Office of Export receives an invalidation request from the Declarant/Representative, the Customs Office of Export validates it and either it is found valid and proceeds to the invalidation of the export declaration while informing Declarant/Representative and MSA of Dispatch, or it is found invalid thus informs the Declarant/Representative about the invalidation request rejection and returns to the previous point of expecting normally the decision to release or non-release of the goods.

In the same time, at the MSA of Dispatch, the respective events might occur:

- ☐ Either the release notification arrives, the MSA of Dispatch informs the Consignor; or
- ☐ The invalidation notification arrives, thus the MSA of Dispatch forwards it to the Consignor and the process ends; or
- ☐ The non-release notification arrives, thus the MSA of Dispatch informs the Consignor and the process ends.

After the release of the goods

After the release of goods, one of the following might occur:

- ☐ If the Customs Office of Export receives the exit results from the Customs Office of Exit, the Customs Office of Export informs about the exit or not exit of the goods the Declarant/Representative and the MSA of Dispatch and the process ends here;
- ☐ If the Customs Office of Export receives an invalidation message from the Declarant/Representative, validates the invalidation request and examines if the request is valid. When the request is valid, the Customs Office of Export invalidates the customs declaration, and the process ends here. When the request is not valid, the Customs Office of Export rejects the invalidation requests and waits until to receives an exit result message or an invalidation message or an invalidation of the export declaration by the Customs Officer decision;
- ☐ If the Customs Office of Export receives an invalidation of the export declaration by the Customs Officer decision, the Customs Office of Export decides to invalidate and invalidates the customs declaration. The Customs Office of Export informs the Declarant and the MSA of Dispatch and the process ends here;
- ☐ If the Timer to Receive Exit Results expires, the Customs Office of Export decides to invalidate and invalidates the customs declaration. The Customs Office of Export informs the Declarant and the MSA of Dispatch and the process ends here.

In the same time, at the MSA of Dispatch, the respective events might occur:

- ☐ Either the invalidation notification arrives, thus the MSA of Dispatch forwards it to the Consignor and the process ends; or
- ☐ The exit results arrive (positive/negative), thus the process ends here and shall continue from the parent model L3-CORE-01-21 (and from there in the L3-CORE-01-02).

Table 5.243: Event Export Presentation Notification Received

Task Validate Export Presentation Notification

TASK ATTRIBUTE NAME	TASK ATTRIBUTE VALUE
Task Name	Validate Export Presentation Notification
Task Type	Task
Description	Upon the reception of the Export Presentation, the AES at the Customs Office of Export requests again the e-AD from the EMCS at the MSA of Export (same with MSA of Dispatch or different than MSA of Dispatch). Additionally, in case the pre-lodged export declaration is corrected by the Declarant/Representative in AES, the AES at the Customs Office of Export requests the e-AD from EMCS. This is not depicted in the L3 model for simplification purposes.

5.2.16. Process L3-CORE-01-23-Exportation of Goods under Excise Duty Suspension when MSA of Dispatch is different than MSA of Export/Destination

5.2.16.1. Objective of Process

The purpose of the current process is to describe the exportation of goods under Excise Duty Suspension when MSA of Dispatch is different than MSA of Export/MSA of Destination. This is in accordance with Council Directive (EU) 2020/262, Delegated Regulation (EU) 2022/1636 and Implementing Regulation (EU) 2022/1637; the Union Customs Code and its Implementing and Delegated Act (Council Regulation (EU) 952/2013, Implementing Regulation (EU) 2015/2447, Delegated Regulation (EU) 2015/2446)

Before the acceptance of the Export Declaration

In the MSA of Export/MSA of Destination, the process starts when it receives an e-AD request. The MSA of Export/MSA of Destination identifies if the e-AD is available by requesting the status of the e-AD from MSA of Dispatch.

In the MSA of Dispatch the process starts by receiving the status request and the MSA of Dispatch sends back to the MSA of Destination/MSA of Export whether the e-AD is available and if yes, in which status it is.

Then, in the MSA of Export/MSA of Destination:

- ☐ If the e-AD is not available, the MSA of Export/MSA of Destination forwards the e-AD rejection to the Customs Office of Export and the process ends here for the MSA of Export/MSA of Destination;
- ☐ If the e-AD is available and in the correct state, the MSA of Export/MSA of Destination forwards the e-AD to the Customs Office of Export.

The flow continues in the Customs Office of Export.

Upon the receipt of the response from the MSA of Export/MSA of Destination, the Customs Office of Export identifies if all requested e-AD(s) were received:

- ☐ If not all the e-AD(s) are available, the process ends at this point for Customs Office of Export;
- ☐ If all the e-AD(s) are available, the Custom Office of Export cross-checks the e-AD and the customs declaration.

Then, the Customs Office of Export examines if the cross-check result is positive:

- ☐ If the result is negative, the Customs Office of Export notifies the MSA of Export/MSA of Destination about the negative cross-check result and optionally (subject to national implementation) about the rejected export declaration. The process ends here at the Customs Office of Export. Then, the MSA of Export/MSA of Destination forwards the rejection of export declaration to the MSA of Dispatch, which forwards the rejection of the export declaration to the Consignor and the process ends here for the MSA of Export/MSA of Destination and MSA of Dispatch;

- ☐ If the result is positive the Customs Office of Export determinates if export declaration is lodged prior to the presentation of the goods.

The Customs Office of Export examines if the declaration is lodged prior to the presentation of the goods:

- ☐ If the export declaration is not lodged prior to the presentation of goods, the Customs Office of Export accepts the customs declaration and sends a notification for accepted declaration to the MSA of Export/MSA of Destination and to the Declarant or Representative. The MSA of Export/MSA of Destination forwards the export declaration acceptance to the MSA of Dispatch and the MSA of Dispatch forwards the notification of accepted declaration to the Consignor;

- ☐ If the export declaration is lodged prior to the presentation of goods, then one of the following might occur:

- o If the Customs Office of Export receives an export presentation notification from the Declarant, then validates the export presentation notification and accepts the customs declaration. Then, sends a notification

EU Customs High Level and Business Requirement BPM Report	REF: EU Customs High Level and Business Requirements BPM Report for Core
Excise High Level and Business Requirements BPM Report for Core	
PROCESS MODELS	

for accepted declaration to the MSA of Export/MSA of Destination and to the Declarant or Representative. The MSA of Export/MSA of Destination forwards the export declaration acceptance to the MSA of Dispatch and the MSA of Dispatch forwards the notification of accepted declaration to the Consignor;

- o If the time limit to receive the export presentation notification expires, the Customs Office of Export rejects the customs declaration lodged prior to the presentation of goods, notifies the Declarant/Representative and the MSA of Export/MSA of Destination about the rejection of export declaration due to timer to receive export presentation notification expiry, which forwards the rejection of the export declaration to the Consignor and the process ends here for the MSA of Export/MSA of Destination and MSA of Dispatch and for the Customs Office of Export ;

- o If the Customs Office of Export receives a cancellation request for the pre-lodged export declaration from the Declarant, the Customs Office of Export validates the cancellation request and examines if the request is valid. In case the Customs Office of Export accepts the request, notifies the Declarant/Representative and the MSA of Export/MSA of Destination about the rejection of export declaration due to cancellation of the pre-lodged, which forwards the rejection of the export declaration to the Consignor and the process ends here for the Customs Office of Export. In the opposite case of having the Customs Office of Export rejecting the request, the Customs Office of Export restarts the timer to receive an export presentation notification and waits to receive an export presentation notification or a cancellation request for the pre-lodged export declaration.

In the same time, at the MSA of Export/MSA of Destination, the respective events might occur:

- ☐ Either the e-AD negative cross-check result arrives and the rejection of the export declaration shall be forwarded to the MSA of Dispatch; or
- ☐ The notification for rejected declaration arrives due to either the cancellation of the pre-lodged export declaration or the expiry of time limit to receive the export presentation notification. The rejection of the export declaration shall be forwarded to the MSA of Dispatch; or
- ☐ The notification for accepted export declaration arrives and the process is still active at the MSA of Export/MSA of Destination.

In the same time, at the MSA of Dispatch, the respective events might occur:

- ☐ Either the notification for rejected declaration arrives due to either the cancellation of the pre-lodged export declaration or the expiry of time limit to receive the export presentation notification. The rejection of the export declaration shall be forwarded to the Consignor; or
- ☐ The notification for accepted export declaration arrives, it shall be forwarded to the Consignor and the process is still active at the MSA of Dispatch.

After the acceptance of Export Declaration but before the release of the goods

the Customs Office of Export performs risk analysis and controls. Then, after this, one of the following might occur:

- ☐ If the Customs Office of Export receives an amendment request the process ends at this point and continues in the parent model L3-CORE-01-21;
- ☐ If the Customs Office of Export takes a decision to release the goods for Export, the Customs Office of Export releases the goods for export and notifies the Customs Office of Exit, the Declarant and the MSA of Export/MSA of Destination. The MSA of Export/MSA of Destination forwards the release notification to the MSA of Dispatch, which shall then inform the Consignor;
- ☐ If the Customs Office of Export takes a decision not to Release the goods for Export, the Customs Office of Export does not release the goods for export and notifies the Customs Office of Exit, the Declarant and the MSA of Export/MSA of Destination. The MSA of Export/MSA of Destination forwards the non-release notification to the MSA of Dispatch, which then shall inform the Consignor and the process ends here for MSA of Export/MSA of Destination;
- ☐ If the Customs Office of Export receives an invalidation request from the Declarant/Representative, the Customs Office of Export validates it and either it is found valid and proceeds to the invalidation of the export declaration while informing Declarant/Representative and MSA of Dispatch (which will inform also the Consignor), or it is found invalid thus informs the Declarant/Representative about the invalidation request

EU Customs High Level and Business Requirement BPM Report	REF: EU Customs High Level and Business Requirements BPM Report for Core
Excise High Level and Business Requirements BPM Report for Core	
PROCESS MODELS	

rejection and returns to the previous point of expecting normally the decision to release or non-release of the goods.

In the same time, at the MSA of Export/MSA of Destination, the respective events might occur:

- ☐ Either the release goods for export decision arrives and it shall be forwarded to the MSA of Dispatch; or
- ☐ The non-release of goods decision arrives and it shall be forwarded to the MSA of Dispatch. The process at the MSA of Export/MSA of Destination ends here; or
- ☐ The invalidation notification arrives and it shall be forwarded to the MSA of Dispatch. The process at the MSA of Export/MSA of Destination ends here.

In the same time, at the MSA of Dispatch, the respective events might occur:

- ☐ Either the release goods for export decision arrives and it shall be forwarded to the Consignor. The process at the MSA of Dispatch ends here; or
- ☐ The non-release of goods decision arrives and it shall be forwarded to the Consignor. The process at the MSA of Dispatch ends here; or
- ☐ The invalidation notification arrives and it shall be forwarded to the Consignor. The process at the MSA of Dispatch ends here.

After the release of the goods

After the release of goods, one of the following might occur:

- ☐ If the Customs Office of Export receives the exit results from the Customs Office of Exit, the Customs Office of Export informs about the exit or not exit of the goods the Declarant/Representative and the MSA of Export/MSA of Destination (which will then inform MSA of Dispatch and MSA of Dispatch shall inform Consignor) and the process ends here;
- ☐ If the Customs Office of Export receives an invalidation message from the Declarant/Representative, validates the invalidation request and examines if the request is valid. When the request is valid, the Customs Office of Export invalidates the customs declaration, and the process ends here. When the request is not valid, the Customs Office of Export rejects the invalidation requests and waits until to receives an exit result message or an invalidation message or an invalidation of the export declaration by the Customs Officer decision;
- ☐ If the Customs Office of Export receives an invalidation of the export declaration by the Customs Officer decision, the Customs Office of Export decides to invalidate and invalidates the customs declaration. The Customs Office of Export informs the Declarant and the MSA of Export/MSA of Destination (which will then inform MSA of Dispatch and MSA of Dispatch shall inform Consignor) and the process ends here;
- ☐ If the Timer to Receive Exit Results expires, the Customs Office of Export decides to invalidate and invalidates the customs declaration. The Customs Office of Export informs the Declarant and the MSA of Export/MSA of Destination (which will then inform MSA of Dispatch and MSA of Dispatch shall inform Consignor) and the process ends here.

In the same time, at the MSA of Export/MSA of Destination, the respective events might occur:

- ☐ Either the exit results arrive (positive/negative) and the process ends for the MSA of Destination/MSA of Export here. Process shall be continued in the L3-CORE-01-22 (and from this point to L3-CORE-01-02); or
- ☐ The invalidation notification arrives, thus the MSA of Export/MSA of Destination forwards it to the MSA of Dispatch and the process ends.

Task Validate Export Presentation Notification

TASK ATTRIBUTE NAME	TASK ATTRIBUTE VALUE
Task Name	Validate Export Presentation Notification
Task Type	Task
Description	Upon the reception of the Export Presentation, the AES at the Customs Office of Export requests again the e-AD from the EMCS at the MSA of Export (same with MSA of Dispatch or different than MSA of Dispatch). Additionally, in case the pre-lodged export declaration is corrected by the Declarant/Representative in AES, the AES at the Customs Office of Export requests the e-AD from EMCS. This is not depicted in the L3 model for simplification purposes.
Appears in the following processes	L3-CORE-01-22-Exportation of Goods under Excise Duty Suspension when MSA of Dispatch is the same with MSA of Export L3-CORE-01-23-Exportation of Goods under Excise Duty Suspension when MSA of Dispatch is different than MSA of Export/Destination
